3Pano Solution Domains

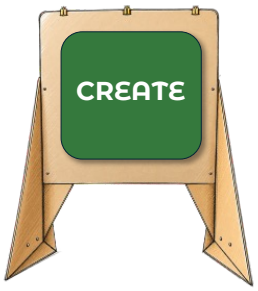

The four solution domains describe three different purposes:

Make thinking visible. Make decisions together.

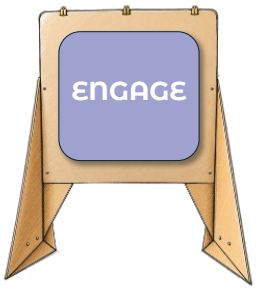

The **THINK** domain is about turning individual thoughts and perspectives into shared understanding.
Use 3Pano facilitation boards when people need to understand a situation, explore a problem, compare perspectives, identify patterns, align their thinking or make decisions together.

Turn ideas into something people can develop together.

The **CREATE** domain is about moving beyond discussion; it is about giving ideas form so they can be explored, shaped and developed together.
Use 3Pano facilitation boards when people need to generate concepts, plans or solutions, organise, prototype or develop new ideas and solutions.

Give people a visible way to participate.

The **ENGAGE** domain changes the relationship between organisation and audience. Instead of people simply: **watching → listening → receiving,**
they: **contribute → respond → create → influence.**
Use 3Pano facilitation boards to involve an audience, community, customers or participants.

Turn different perspectives into clear choices and action.

The **DECIDE** domain is about moving from possibilities, opinions and discussion to clear choices, shared commitment and action.
Use 3Pano facilitation boards when people need to evaluate options, establish priorities, resolve differences, make decisions or turn decisions into concrete next steps.
