How the 3Pano solution domains fit together

The four domains represent different purposes for using 3Pano. Each addresses a different need, but they can also be combined to support a complete process from involving people to understanding challenges, developing ideas and making decisions.

The four domains are deliberately connected:

	THINK	CREATE	ENGAGE	DECIDE
Main purpose	Understand & decide	Develop & build	Participate & contribute	Possibilities, choice, action
Main users	Teams & leaders	Teams & innovators	Audiences & communities	Leaders, decision makers
Typical situation	Meeting / strategy	Workshop / innovation	Event / exhibition	Decision-making / prioritisation
Participant role	Thinker	Creator	Contributor	Decision-maker
3Pano role	Thinking canvas	Creation canvas	Participation space	Decision space
Main outcome	Clarity & decisions	Ideas & solutions	Engagement & insight	Decisions and commitment

How the domains work together?
The four domains are not separate activities or a fixed sequence. They can be combined depending on what people need to achieve.

For example:
ENGAGE → THINK → CREATE → DECIDE
A company might:

1. ENGAGE customers to understand their experiences and needs.
2. THINK with its team about what they have learned.
3. CREATE new services or solutions.
4. DECIDE which solutions to pursue and how to implement them.

A community might:

1. ENGAGE citizens to collect their views.
2. THINK with stakeholders about the key challenges.
3. CREATE possible solutions together.
4. DECIDE on priorities and concrete actions.
